## **New Safety Recall Advanced Communication – 58A**

FCA US LLC (FCA US) has announced a safety recall on certain 2021 through 2023 model year (WL) Jeep Grand Cherokee and Grand Cherokee L vehicles.

### **REASON FOR THIS SAFETY RECALL**

Some of the above vehicles may have been built with an incorrectly assembled steering column intermediate shaft which may potentially disconnect from the U-joint. Driver may notice play in steering and/or noise when turning prior to the intermediate shaft disconnecting. A disconnected intermediate shaft may result in a loss of steering control which can cause a vehicle crash without prior warning.

### **SERVICE ACTION**

FCA US will conduct a voluntary safety recall on all affected vehicles to inspect and, if necessary, replace the intermediate shaft and assembly parts. The remedy for this condition is not currently available. Dealers will be notified of the launch of this safety recall by way of established communication methods. This recall is estimated to launch in 2nd Quarter of 2023.

We ask that you please take the time to ensure that your personnel are aware of this communication and are prepared to execute a customer friendly process for inquiries regarding involved vehicles.
